

Care2Talk for Families

Empowering families to connect regularly.

Care2Talk is a video calling platform that provides the easiest to use, most secure way for seniors to connect with family, friends, and their support network.

Technology you both can use

- Tablet serves single purpose connecting you and your loved ones without staff involvement.
- Family members can download the Care2Talk app on any device and connect with your loved one's tablet anywhere, anytime, with no limits.

Our Solution

Purpose-Built for Seniors

Our platform provides the simplest way to connect with your loved ones virtually. Connect regularly using a platform that your loved ones can and will use.

Zero Risk of Fraud and Spam

Our closed contact list means no risk of fraud or scam calls. Care staff and a key family member can remotely manage your loved one's contact list.

Reduced Guilt

Despite demographic shifts spreading families apart, we provide an easy avenue for older adults to build and maintain relationships with family and friends.

Monitor your Loved One's Well-being

We allow for a better exchange of information since both caller and receiver can regularly see and interpret body language and emotional responses.
