

HOW TO INSTALL SKYPE ON WINDOWS 10

1

On a computer, use your internet browser to visit the website www.skype.com

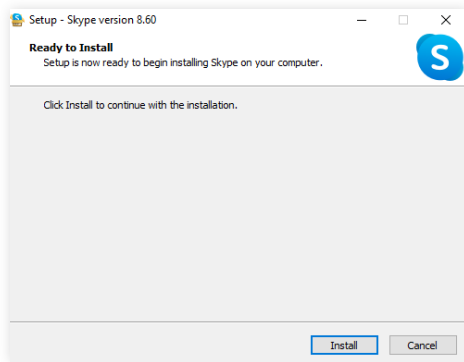

3

Under **Skype For Desktop** select **Get Skype for Windows** or the drop-down arrow to select another type of computer.

5

Click **Install**.

Always to try to push the Skype software forward by selecting options that make the most common sense to move towards launching Skype successfully.

2

Click on the **Download button** near the upper left corner.

4

Click **Run** if/when your computer asks for permission to download Skype.

6

The Skype Installer will display the progress of the download. Once complete, the Skype application will open automatically.

Note

You may be required to take action to proceed through the installation process by selecting **Yes** if/when given the option. For some users, you may also require your computer's password to permit the install.

You're all set. Time to Launch a Skype Call!
